

TONE YOUR WAY

JANGLEMASTER

DESCRIPTION

- Full analog OD / preamp based on the iconic AC style British amp.
- Amp-like overdrive ranging from sparkly clean to fully cranked saturation.
- Independent Boost Channel switch to choose between Rangemaster Treble Booster style and Classic Volume Booster.
- **TRIAD Magnetics** Military "Red Spec" (MIL-T-27E) High Reliability Audio transformer.
- Parallel mode relay switching (True By Pass).

OPERATION

- Run a cable from your guitar to the Vs Audio "JANGLEMASTER" INPUT jack and run another cable from the Vs Audio "JANGLEMASTER" OUTPUT jack to your amplifier.
- Start with all controls at 12 o' clock.
- Turn the effect on by pressing the footswitch. Parallel mode relay switching behaves like a standard footswitch plus the ability "HOLD-RELEASE" feature. Press and hold the relay switch, instant the effect turns on, release the switch, instant the effect is bypass
- Rotate the VOLUME knob clockwise or counterclockwise to maintain unity volume with clean signal.
- Rotate the tone stack knobs (BASS, TREBLE, CUT) clockwise to boost frequencies or counterclockwise to decrease them.
- Rotate the GAIN knob clockwise to increase the amount of gain or counter clockwise to decrease it.
- Use the BOOST footswitch to toggle between Rangemaster Treble style & Classic Volume Booster.

CONTROLS

- 1 **GAIN** controls the amount of gain of the Top Boost channel.
- 2 **BOOST** switch, selects between Rangemaster Treble style & Classic Volume Booster.
- 3 **VOLUME** controls the output of the effect.
- 4 **BASS** adjusts the low frequency content of the sound.
- 5 **TREBLE** adjusts the amount of upper frequencies in the sound.
- 6 **CUT** decreases (clockwise) the higher frequencies in the sound.
- 7 **BYPASS** footswitch toggles effect on/bypass (white LED indicates on).
- 8 **BOOST** footswitch enables Boost Channel (white LED indicates on).
